GATEWAY GULF 2024

INVESTING IN A RAPIDLY TRANSFORMING REGION

Gulf Cooperation Council (GCC) countries represent one of the world's greatest development success stories. As the region makes strides towards ambitious economic diversification targets, numerous highly attractive investment opportunities emerge.

GCC's GDP reached US\$2.12 trillion in 2023 and is expected to reach US\$3 trillion by 2030 with a further increase to US\$6 trillion by 2050 if the growth rates continues on the current pace, according to the World Bank.

With over US\$30 billion worth of strategic projects in its pipeline, the Kingdom of Bahrain is no exception. Non-oil contribution to GDP was 84% in 2023, making it the most diversified economy in the Gulf.

The Kingdom's sophisticated and expanding infrastructure, coupled with pro-innovation, investor-supportive policies and a highly skilled talent pool, provide a business-friendly environment for organisations of all sizes and in all sectors to thrive, with financial services, manufacturing, logistics, information & communication technology, and tourism continuing to grow year on year.
